

BaseN teams up with Starbridge Networks

BaseN joins forces with Starbridge Networks to strengthen presence in the Caribbean, Central and South America

ATLANTA, Ga. & WESTON, FL., July 3, 2009 – BaseN North America, Inc., a subsidiary of BaseN Corporation of Helsinki, Finland, has selected Starbridge Networks, L.L.C., a broadband telecom solutions provider, as a reseller of its next generation Network Monitoring and Management Service Suite. BaseN North America joins forces with Starbridge Networks to deliver and support BaseN's highly secure, flexible, scalable and ubiquitous Network Management Software Suite for the Caribbean, Central America and select South American markets.

"We are thrilled to have combined forces with Starbridge Networks to deliver our products and services," says Rhett Williams, President of BaseN North America, Inc. "I am confident that this relationship will expand and strengthen BaseN's presence in the Americas," added Dennis Roth, Vice President of BaseN North America, Inc.

"We are enthusiastic about this relationship because we share a common focus to provide innovative solutions that will allow customers to optimize their existing infrastructure and operation, and increase their revenue streams through new service capabilities while lowering operational cost and promoting increased quality of network-based services," says Enrique Diaz, Manager and CEO Starbridge Networks.

"Starbridge Networks innovative broadband solutions generate very effective high-speed Internet environments for next-generation Software as a Service, SaaS business model used by BaseN. Today, the Starbridge solutions are deployed in Hundreds of Enterprises, Telecom and Service Providers in the US, Latin America and the Caribbean, that will greatly benefit from BaseN software services to monitor, measure, analyse and forecast massive data flows" says Mr. Diaz, President and CEO Starbridge Networks.

About BaseN

BaseN, an international technology group headquartered in Finland and operating around the globe, is dedicated to large-scale infrastructure monitoring and management. Founded in 2001, BaseN has developed a comprehensive suite of network monitoring and reporting services, which is in use by Enterprises and Operators around the world, giving customers the ability to pinpoint and resolve bottlenecks, outages, and third-party problems within seconds of their occurrence. BaseN offers a complete portfolio of services that monitor, measure, analyze and forecast data flows, which provide real-time network metrics and alerting functions through tailored web based customer portals.
